

NAPI PRIVACY POLICY

1. Introduction

Welcome to Napi, a platform that provides an easy REST API for accessing data from your Notion workspace, along with a web application for managing your projects in a structured and efficient way.

Napi is designed for developers, teams, and makers who use Notion to manage content or structured data (such as blogs or product catalogs) and want to make that data available through a clean, customizable API. With Napi, you can connect your Notion workspace, automatically generate an API for your content, and manage multiple projects through a simple web interface.

This Privacy Policy explains how we collect, use and protect any personal data you provide when using Napi. Personal data is any information that can identify you, such as your name, email address or IP address. It applies to everyone who uses Napi or visits the Napi website.

Napi is operated by Vojtěch Habeš, a self-employed individual registered in the Czech Republic, IČO: 23492082, with a registered office at Fibichova 1272, 271 01 Nové Strašecí.

This policy is effective as of 25. 9. 2025.

2. What data we collect

We ask for your account info which includes your email address and a hashed password, to let you log in.

When you connect your Notion workspace, we access the pages, databases and properties you choose, but we never store their content permanently; we only cache requests briefly to speed up the API. We keep the tokens required to talk to your workspace so that the service can run.

To monitor and improve Napi, we log basic usage details: your IP address, browser or device type, API call records and any error reports. If you reach out for support, we retain your messages and attachments so we can help.

For billing, Stripe collects and processes your payment details directly on our behalf. We do not store your payment method details on our servers.

Finally, we use cookies and Firebase analytics identifiers to power the website and track general usage.

3. How we use your data

We use your data to provide and improve the Napi service. This includes:

- Keeping your API connected to your Notion workspace and running smoothly.
- Letting you log in and manage your projects through the web app.
- Responding to support requests and solving issues.
- Monitoring how the service is used to fix bugs and improve features.
- Making sure your account is secure and protected from abuse.
- Sending important updates or information about your account.
- Sending occasional product news or offers, but only if you've agreed to receive them (you can unsubscribe anytime).

4. How we share your data

We do not sell your data.

We only share it with trusted services that help us run Napi:

- Firebase (for hosting the app and tracking general usage)
- Notion (to access your workspace through their public API)
- Stripe (to process payments securely)

We may also share data if required by law or legal processes.

We never share your data with anyone else.

5. Data retention

We keep your account data, like your email and API tokens, for as long as your account is active. If you delete your account, we remove this data within 30 days.

Content from your Notion workspace is not stored permanently. We only cache data for up to one hour on a secure CDN to speed up the API.

Basic usage logs (such as IP addresses and API requests) are kept for up to 90 days to help us monitor performance, fix issues, and prevent abuse.

If you contact us for support, we keep your messages for up to 1 year to follow up or understand repeated issues.

You can request deletion of your personal data at any time.

6. Your rights and choices

Under applicable data-protection laws (including the GDPR), you have the right to:

- Access the personal data we hold about you
- Correct or update any inaccurate or incomplete information.
- Delete your personal data (“right to be forgotten”).
- Restrict or object to our processing of your data.
- Port your data to another service in a machine-readable format.
- Withdraw consent at any time for any processing based solely on your consent (e.g., marketing emails).

To exercise any of these rights, please contact us (Section 10).

If you believe we have not handled your data in accordance with the law, you also have the right to lodge a complaint with your local data-protection authority.

7. Cookies and tracking

We use cookies and similar tracking technologies to make Napi work smoothly and understand how it’s used:

- Essential cookies

These are necessary to run the site and keep you logged in. They cannot be disabled.

- Performance and analytics cookies

We use Firebase Analytics identifiers to track general usage patterns (e.g., which pages are visited, API call volumes). This helps us improve performance and debug issues.

- How to manage cookies

You can control or delete cookies in your browser settings at any time. Note that disabling essential cookies may prevent parts of Napi from working correctly.

8. Data security

We take the security of your data seriously and use trusted tools to protect it:

- Napi runs on Firebase, which encrypts data both in transit and at rest.
- Your password is never stored in plain text. We use hashed and salted passwords.
- All connections to Napi are made over HTTPS.
- API tokens and other sensitive data are stored securely and never exposed to other users.

We regularly review our systems and practices to keep your data safe from unauthorized access, misuse, or loss.

9. Changes to this privacy policy

We may update this Privacy Policy from time to time to reflect changes to our service, technology, or legal requirements.

When we make changes, we will:

- Update the “Effective Date” at the top of the policy.
- Post the updated version on our website.
- Notify you by email or in the app if the changes are significant.

We encourage you to review this policy occasionally to stay informed about how we protect your data.

10. Contact

If you have any questions, concerns, or requests regarding this Privacy Policy or the Napi service, please contact us at:

Email: info@getnapi.com

We aim to respond to all inquiries promptly.
